

## SEAPORTE CONTRACT INFORMATION

### Task Orders

None received to date.

### Technical Instructions Issued Against Task Orders

None received to date.

### List of Team Members / Area of Expertise / Experience

#### **Biztech Solutions**

[www.forbiztech.com](http://www.forbiztech.com)

Biztech Solutions has certified engineers and developers that provide analysis, design, development, and “first call” support services throughout the United States. Biztech has accumulated years of process engineering and related LAN/WAN and Internet experience, through which they can create / support business and IT solutions in numerous industries.

Biztech Solutions has the ability to support the following Functional Areas:

- Business Process Reengineering
- Project Management
- Workflow Integration
- Document and Data Capture Solutions
- Content Management Solutions
- Records Management Solutions
- Legacy System Integration
- Forms Processing Applications
- Portal-based Access Solutions

Points of contact:

**Council for Logistics Research, Inc.**      [www.clrexec.com](http://www.clrexec.com)

Council for Logistics Research, Inc (CLR) is a Service Disabled Veteran Owned (SDVO) Small Business Concern (SBC) that supports the Air Force and other DoD agencies. CLR is headquartered in Arlington VA, employs cleared acquisition specialists, professional consultants, research analysts, domain engineers, system architects, logisticians, web developers and functional specialists.

CLR has the ability to support the following Functional Area:

- Engineering, Systems Engineering and Process Engineering Support

Points of contact:

William Farrell

[wfarrell@clrexec.com](mailto:wfarrell@clrexec.com)

703-412-1563

**Diverse Concepts, Inc.**      [www.diverseconcepts.com](http://www.diverseconcepts.com)

Diverse Concepts (DCi) is a Service Disabled Veteran Owned (SDVO) Small Business Concern (SBC) provides technology solutions and consulting to government and private sector clients. Diverse Concepts (DCi) provides it's customers with full systems integration and complete systems operations support as well as end-to-end computer and network security services.

DCi has the ability to support the following Functional Areas:

- Systems Engineering, Development, Programming, and Network Support
- Software Engineering, Development, Programming, and Network Support
- Information System (IS) Development, Information Assurance (IA), and Information Technology (IT)

Points of contact:

Jeremy Paris

**Flatirons Solutions, Inc.**      [www.flatironssolutions.com](http://www.flatironssolutions.com)

Flatirons Solutions is a Woman-Owned Small Business (WOSB) providing high-end system and software engineering, program management, and consulting services to government and commercial customers. Flatirons Solutions standard engineering and

management procedures comply with recommended practices for Level 3 of the Software Engineering Institute's (SEI) Capability Maturity Model (CMM) and International Standards Organization (ISO) 9000 standards.

Flatirons Solutions has the ability to support the following Functional Areas:

- Engineering, Systems Engineering and Process Engineering Support
- Modeling, Simulation, Stimulation, and Analysis Support
- System Design Documentation and Technical Data Support
- Software Engineering, Development, Programming, and Network Support
- Information System (IS) Development, Information Assurance (IA), and Information Technology (IT)
- Program Support

Points of contact:

**Global Enterprises Solutions, (GES) LLC. [www.strategicpartner.biz](http://www.strategicpartner.biz)**

Global Enterprises Solutions, (GES) LLC, is a veteran-minority owned small business (SB, VOSB) established in 2006. We enhance project satisfaction by ensuring project requirements are clearly determined, interpreted and fulfilled to the customer's satisfaction, in line with contractual commitments.

We are a Systems Integration and IT Solutions provider that services the commercial and government industry. As a systems integrator and IT Solutions provider we combine a variety of technologies and services to provide full-fledged solutions ranging from application specific to enterprise wide. By integrating distributed computing to support infrastructure where processing can be shared, but sensitive to flux in demand and effectively leverage customer resources. This will enable an initial framework within which to evaluate advances to come.

GES has the ability to support the following Functional Areas:

- Research and Development Support
- Engineering, Systems Engineering and Process Engineering Support
- Software Engineering, Development, Programming, and Network Support
- Reliability, Maintainability, and Availability (RM&A) Support
- Human Factors, Performance, and Usability Engineering Support
- System Safety Engineering Support
- Information System (IS) Development, Information Assurance (IA), and Information Technology (IT)
- Interoperability, Test and Evaluation, Trials Support
- Logistics Support
- Supply and Provisioning Support
- In-Service Engineering, Fleet Introduction, Installation and Checkout Support
- Program Support

- Functional and Administrative Support

Points of contact:

**Northrop Grumman Defense Mission Systems** [www.northropgrumman.com](http://www.northropgrumman.com)

Northrop Grumman Corporation is a global defense company headquartered in Los Angeles, California. Northrop Grumman provides technologically advanced, innovative products, services and solutions in system integration, defense electronics, information technology, advanced aircraft, shipbuilding and space technology. With more than 125,000 employees, and operations in all 50 states and 25 countries, Northrop Grumman serves U.S. and international military, government and commercial customers.

Northrop Grumman has the ability to support the following Functional Areas:

- Research and Development Support
- Engineering, Systems Engineering and Process Engineering Support
- Modeling, Simulation, Stimulations, and Analysis Support
- Prototyping, Pre-Productions, Model-Making, and Fabrication
- System Design Documentation and Technical Data Support
- Software Engineering, Development, Programming, and Network Support
- Human Factors, Performance, and Usability Engineering Support
- System Safety Engineering Support
- Configuration Management (CM) Support
- Quality Assurance (QA) Support
- Information System (IS) Development, Information Assurance (IA), and Information Technology (IT) Support
- Ship Inactivation and Disposal Support
- Measurement Facilities, Range, and Instrumentation Support
- Training Support
- Program Support

### **UAV Communications**

[www.uavcomm.com](http://www.uavcomm.com)

UAV Communications, Inc. (UAV Comm) is a SBA-certified 8(a), veteran-owned Information Technology Company specializing in Unmanned Aerial Vehicle / System (UAV/S) digital video dissemination, video communications technology, network services, wireless, and IP-based Land Mobile Radio (LMR) technology. We support our customers in developing system architectures, requirements, operational plans, Concepts of Operations (CONOPS), and Concepts of Employment (CONEMP). Leveraging our knowledge and experience in the Department of Defense arena, we provide subject matter experts to help local, state and federal agencies utilize UAVs as part of their security, intelligence and situational awareness.

We design, engineer and staff UAV/S operations centers supporting full-motion video dissemination. We specialize in staffing video dissemination operations centers for organizations that utilize video for security concerns, situational awareness and public safety. We staff and design, activities for video collection, dissemination, and Video Tele-Conferences. Our designs are used today by the Department of Defense (DoD) and have streamlined inter-theater video distribution supporting the Global War on Terrorism. Our networking and communications technicians provide Help Desk, System Administration, and Information Assurance services to staff IT networks.

UAV Communications has the ability to support the following Functional Areas:

- Engineering, Systems Engineering and Process Engineering Support
- System Design Documentation and Technical Data Support
- Software Engineering, Development, Programming, and Network Support
- Configuration Management (CM) Support
- Information System (IS) Development, Information Assurance (IA), and Information Technology (IT)

**Points of Contact for Seaport-e Services Performed**

TBD

**Quality Assurance Program**

SITS has mature Quality Assurance (QA) procedures, processes, and toolsets for reviewing task order performance and for preparing, inspecting and testing all TO deliverables. Our approach to QA has two components: Quality Control (QC) and Process Improvement. Dr. Tom Tascione will serve as QA director for our Seaport-e Team. An appropriate degree of QA oversight will be assigned to each TO. For example, a fifty person task order may have dedicated QA personnel, while a three person task may depend on the QA Director to provide oversight. The QA Director is responsible for tailoring our standard QA processes for each TO. On a specific TO, the QA personnel are responsible for implementing and enforcing the tailored QA process across TO Team resources, schedules and deliverables.

Our Quality Control (QC) process assures the necessary corrective actions are taken if any inspections, review, test, or demonstration of deliverables fails a set of predetermined quality criteria/gates derived from the TO performance requirements. Each TO is subdivided into manageable sub-tasks that can be tracked using objective performance measurements and completion criteria. Generation of metric data is an inherent part of each sub-task procedure in our standard QA process. Examples of metric data include performance measurements, unit test results, regression test results, peer reviews, product inspection results, etc. Required metric data is specifically identified as an output for each procedure.
